Cost reduction and
efficiency gains

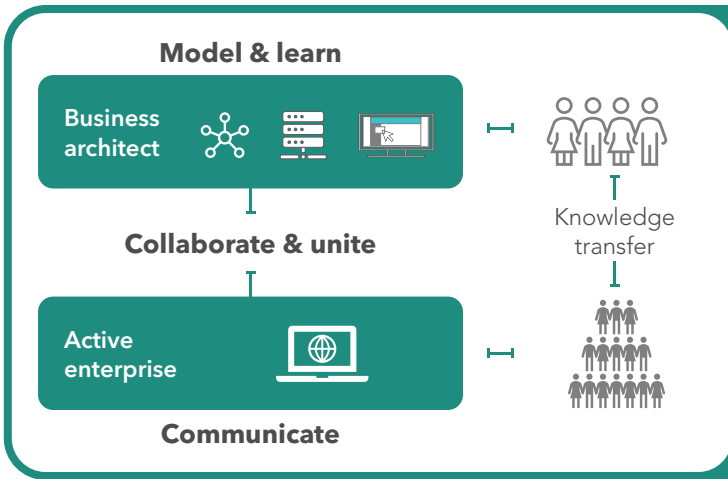

Process management & governance

- Transform models into live, digital depictions of ongoing operations.
- Monitor progress of initiatives, risks and opportunities.
- Achieve traceability and assess impact.

Boost simple model sharing by creating dynamic dashboards and digitising processes, with no code required, to secure real-time stakeholder input.

Transformation through execution!

Model the landscape

Use business architect to:

- Model systems, assets, people, processes & relationships
- Represent current & envisioned states
- Deploy domain ontology & taxonomy
- Adopt frameworks (TOGAF or NAF) & ArchiMate 3.2 notation

Flexible modelling for every business.

Evidence & explore

Discover unmissable insights:

- Aggregate data from multiple sources
- Assess risks & opportunities
- Pinpoint gaps to verify and validate
- Prototype desired business models

Revolutionised insights, transformed perspectives.

“MooD creates clarity and shared understanding among stakeholders, so everyone is working towards the same strategic and operational goals.”

Agilent International

Collaborate & execute

Promote change management through active enterprise:

- Share & monitor strategies & initiatives
- Use the drag-and-drop no-code builder for:
 - Tailored dashboards
 - Bespoke portals & applications
 - Data entry interfaces

Transforming vision into action.

“Its unique no-code configuration ensures agility to meet your web-based needs effortlessly...”
